

FTC Regulations and “Red Flags” Rule:

The Federal Trade Commission has imposed new regulations for physicians, hospitals and other healthcare providers to develop and implement secure identity theft protection programs by August 1, 2009.

Harsher governmental regulations, vigilant monitoring and stricter enforcement elicit concerns of claims activity, as state attorneys general gain new authority to initiate civil lawsuits under federal law.

Byrne – Kim's Insurance Provider (NAS)' Has turnkey reinsurance products that provide insurance companies with coverage options to protect all physician insureds and healthcare providers. NAS' comprehensive e-MD™ and MEDEFENSE™ Plus policies are fully equipped to meet the challenges presented by the new "Red Flags" Rule and Stimulus Plan requirements.

NAS' turnkey products continue to provide the healthcare industry with full protection from exposures generated by the latest disclosure and notification laws, as well as the potential fines and penalties that can ensue.
